

# Pentonium

*A decentralised freelancing platform for Blockchain Services*

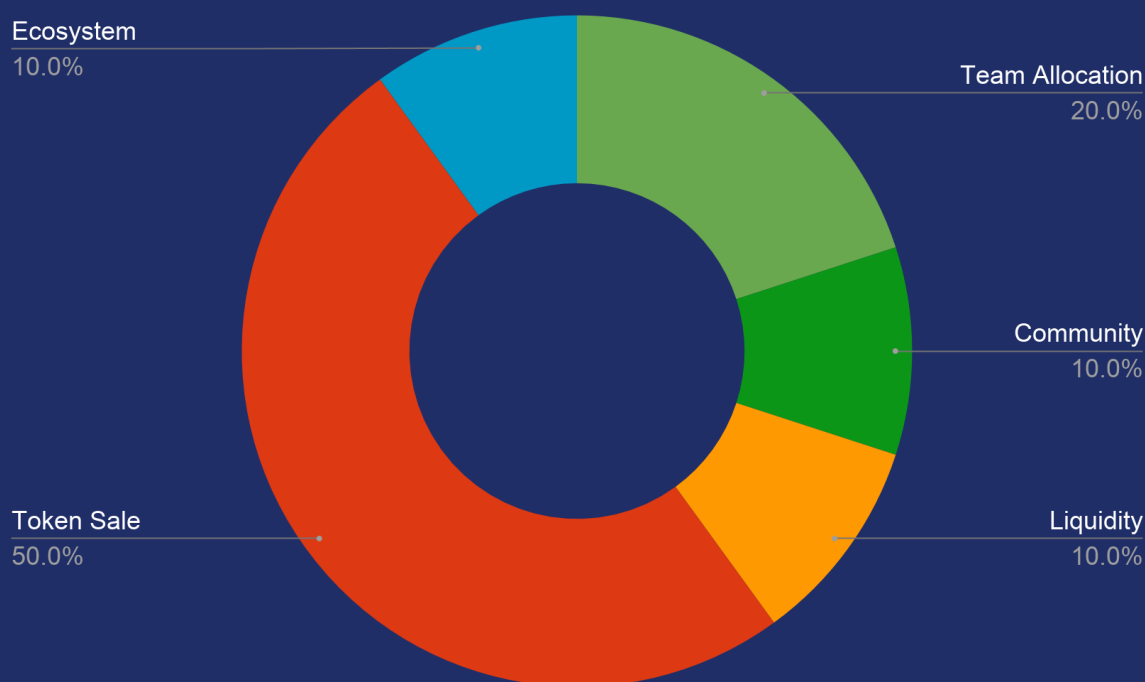

Pentonium is a decentralised platform where you list your skill without the hustle of account creation and approval. Pentonium is focused to aggregate skills mostly used by Blockchain based projects. We have taken an extra step to secure the system and make the payments seamless. For now we are the only decentralised platform with such functionality.

## STATUS: MVP is LIVE

From the very beginning we have taken initiative to procure Solidity Developers, Community Managers, Crypto Experts over our telegram group. This in the long term will help onboard more skilled users.

Pentonium also offers its own Swap and Vault with great incentives. Vault attracts fee collected through dispute resolution and other transactions over freelance platforms, while it also attracts 0.1% fee from the Swap.

Pentonium charges 5% (***Fiverr charges 20% from seller excluding withdrawal charges***) fee on every successful service delivery from the freelance platform, while Swap attracts 0.2% (***Uniswap charges 0.3% fee***) of fee on every transaction of which 0.1% goes to Pentonium. Adding to this, Pentonium also earns a small portion fee from dispute resolution through the freelance platform.
